

THE COVERALL SYSTEM
FOR SAFE TRANSPORT

HYVA COVERALL SYSTEM

COVER A CONTAINER WITHIN A MINUTE WITH OUR SKIPLOADER COVERALL SYSTEM

ADVANTAGES

- Manual or Radio-remote operations available, giving a fast and efficient covering of skips from ground level.
- Lays down the tarp on the cargo without pulling it, reducing the number of times the tarp needs to be changed.
- Complete visibility of the container and surroundings.
- Designed to be far from the container and far from falling objects that could damage the equipment.
- Larger coverage, covering the front and rear of the skip, well suited for larger containers.
- Provides a clear space to remove the chains from the skip.
- The tarp covers the skip starting from a low point at the front, covering most of the skips and avoiding wind blowing underneath the tarp pulling out debris. The tarp also covers the rear of the skip properly.
- A design with easy accessible parts that are accessible allows for an easier repair when required.
- A standard high-density tarp reinforced where it most matters.

This **CoverAll System** allows drivers to fully cover a container within a minute, greatly improving productivity.

The equipment is **operated by hydraulic power** taken from the skiploader. This avoids electric motors and the need for a separate electrohydraulic power pack, **keeping maintenance to a minimum.**

Designed by Hyva engineers, to be integrated into the skiploader equipment, the hydraulics and structure are matched for strength to provide a safe and secure operation without increasing the width of the vehicle.

FEATURES

SAFETY

- Safely cover your load from ground level.
- Width within EU legal limits.
- Hook pole to access the bungees from ground level (optional).

SPEED

- Quick and simple to operate, keeping loading times to a minimum.

FLEXIBILITY

- The CoverAll system is designed to cover various sizes of containers thus providing operational flexibility in all applications.
- Bolt-able solution. It can also be retrofitted to all Titan 2.0 models.

110 countries
+3,500 employees
20,000 customers
+30 subsidiaries
14 production facilities

Hyva is a leading provider of innovative and highly efficient transport solutions for commercial vehicles used in transport, construction, mining, materials handling and environmental service industries.

Founded in 1979 in the Netherlands, the company has a global presence with more than 30 wholly owned subsidiaries, extraordinary service coverage and 14 manufacturing facilities in Brazil, China, Europe and India.
