

LEADERS IN WASTE HANDLING SOLUTION

Work flow

Highlights

Clean:

Unique car seamless joint structure, the whole process without dropping leakage.

High efficiency:

Larger box volume, higher compression ratio, to meet greater loading requirements.

Real materials:

Key hydraulic electrical components are from international well-known brands, and structural parts are made of high-strength steel for a longer service life.

Specifications

Items		Specifications
Vehicle model		SYB5181ZYSEQBEV
Chassis brand		DFM
Dimensions	mm	8780×2530×3120
Fuel type		Electricity
Super Structure model		RC1113
GVW(kg)	kg	18000
Charging time	h	≤2 (Fast charge)
Drive range	km	≤178 (Isokinetic method)
Battery type		LFP
Motor type		Permanent magnet synchronous motor
Water-proof level		IP67
Container volume	m ³	13
Types of waste		Other waste
