HF500 SLC

Highest quality Dutch and German made Heavy Duty cylinders

Double chromated solid piston rods

High pressure filter is standard

All valves/cylinders are protected against road dirt

Passivated hydraulic piping

The drive units are standard preserved against rust by the best Cathodic Dip Painting (CDP) process

The control valve is positioned at the outside of the trailer for easy access

Common-rail technology

Sustainable environmental conservation: Because Hyva Floor fully preserves its drive units with a CDP finish, the system does not need to be repainted or refinished during its lifetime.
